

# The Complete Engineering Solution

Design, Simulation, Manufacturing and Testing

GDTEch is an engineering company with offices in Europe and North America.

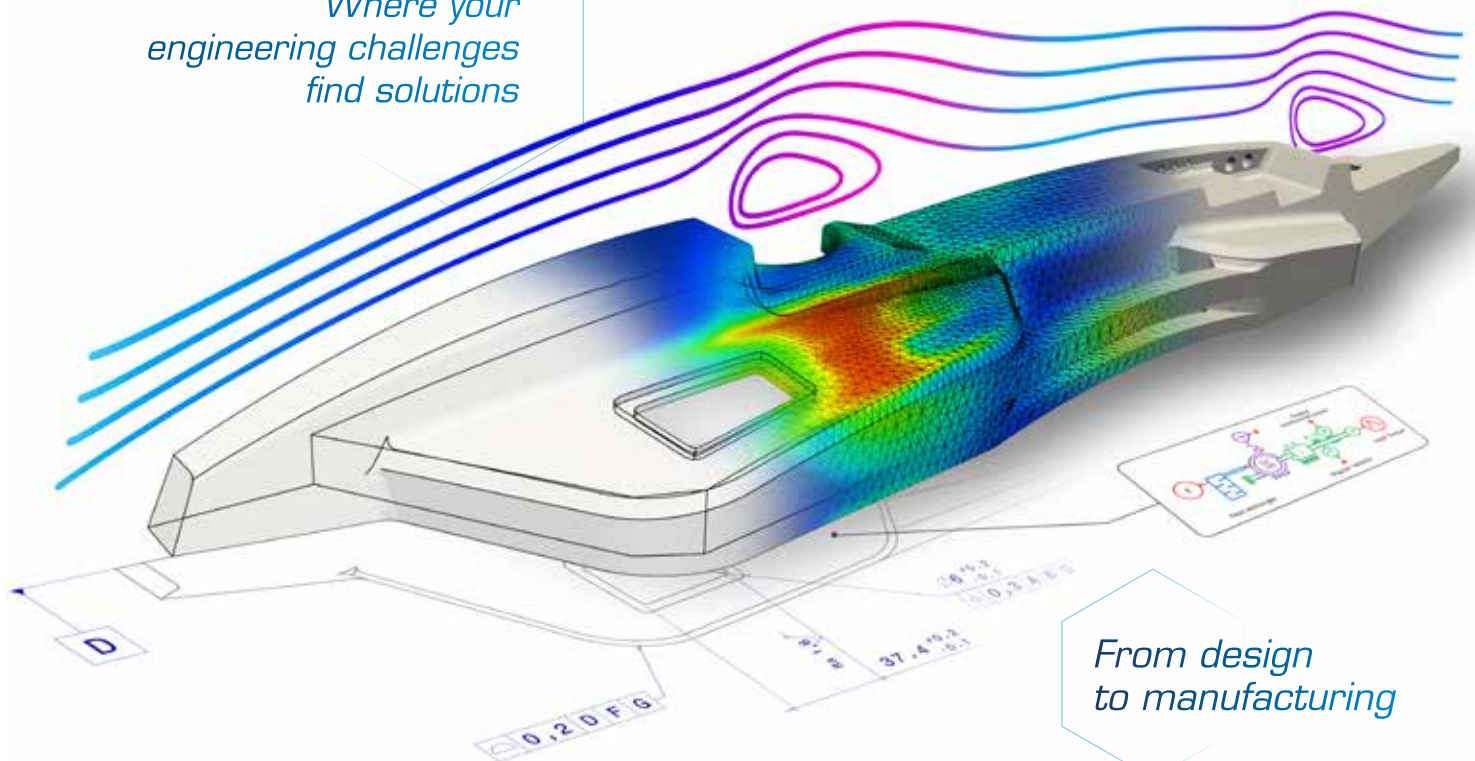

For over 30 years, GDTEch has developed **integrated services covering every aspect of the design and industrialization of your project, leveraging world-class expertise in numerical simulations.**

Our commitment to innovation through significant R&D programs combined with the most advanced technologies and software enables us to bring **tailored solutions to your challenges.** Our assets: our expertise, our skills, and our full suite of CAE services.

To facilitate project execution and collaboration, we also provide strategic resource placement.

# Engineering and Design Services

- > Integrated multidisciplinary system simulation, simulation-based digital twin
- > Advanced numerical simulation
  - Structures, fluid dynamics, process, thermal, acoustics, multiphysics, and manufacturing processes (additive, welding, forming)
- > Prototyping and tooling
  - Design and drafting, manufacturing and testing: components and assemblies, manufacturing tools, industrial equipment and CE certification
- > Global engineering support
  - Project management, customer innovation coordination
- > Approved Software Partner for fluid dynamics, manufacturing processes and system simulation
- > Training and consulting
